

Malathion 2% Dust – Grain Protectant

IPCO Malathion Grain Protectant Dust is:

- *effective against damage from **Rusty Grain Beetle**, Confused Flour Beetle, Flat Grain Beetle, Granary Weevil, Indian Meal Moth, Lesser Grain Borer, Merchant Grain Beetle and Sawtoothed Grain Beetle in stored grain.*
- *registered and can be applied to wheat, rye, barley and oats.
(Do not apply to canola in storage)*
- *usually applied to the grain as it is being loaded in to final grain storage. Best results are obtained when the product is applied evenly through out the grain in the bin.*

For rates and other guidelines refer to the full label under Agricultural products in the Insecticide section.

Please note:

“DO NOT APPLY to grain within 7 days of sale”

“DO NOT APPLY to bins where CANOLA will be stored”

Always read and follow the current IPCO Malathion Grain Protectant Dust label (www.ipco.ca) directions.
