

PROTECT YOUR CROPS FROM INSECT DAMAGE WITH CYGON[®] 480 EC

June 28, 2013

Situation:

Pest management includes weed control by herbicides, but another major aspect of crop protection involves insect control. With the summer comes a number of harmful insect species that can decimate your crops and lower yield.

Solution:

Protect your crops from insects and mites with **Cygon 480 EC** insecticide available at your local retailer. **Cygon 480 EC** is a general purpose insecticide that effectively controls insects and mites systemically and on contact, on a variety of commodities*

Insect & Arachnid Control on Registered Crops*

CROP	PESTS CONTROLLED									
	grasshoppers	aphids	lygus bugs	plant bugs	leafhoppers	leafminers	bean beetles	mites	thrips	wheat midge
soybeans										
peas
