

## CHOOSE LOGIC M FOR ENHANCED WEED CONTROL

June 15, 2015

IPCO **Logic® M** broadleaf herbicide contains bromoxynil and MCPA for excellent control of a wide range of perennials and annuals including weeds with acquired glyphosate resistance (Kochia and Canola); as well as tough weeds like flixweed, stinkweed and wild buckwheat. **Logic M** can also be tank mixed with a variety of broadleaf and grassy weed herbicides for added control of particular weeds.

### 1. Broad Spectrum Broad Leaf Control:

- The combination of bromoxynil and MCPA will provide control of glyphosate resistant Kochia and Volunteer Canola as well as improved control of tough weeds like Wild Buckwheat, Cow Cockle, Lady's Thumb, Hempnettle, Flixweed, Stinkweed and Chickweed.

### 2. Wide Variety of In-Crop Applications:

Registered Crops*								
Wheat	Barley	Oats	Flax	Corn	Fall Rye	Canary Seed	Seedling Grasses	Established Grasses
								

\*Check the product label for proper use rates, based on weed species, infestation level, and growth stage

### 3. Tank Mix Flexibility:

Cereal Crops	Tank Mix Partners	Additional Weed Control
Wheat (spring, winter, durum), Barley	MCPA	hempnettle
Wheat (spring, durum), Barley	Avenge 200-C	wild oats
	Vigil WB	wild oats, green foxtail, yellow foxtail & barnyard grass
	Achieve	Same as Vigil WB plus Persian darnel
	Ally	chickweed & hempnettle
Wheat (spring, durum)	Horizon 240 EC	wild oats, volunteer oats, green foxtail, yellow foxtail, barnyard grass & volunteer canaryseed
Wheat (spring)	Everest 70 WDG	wild oats, volunteer oats & green foxtail

### 4. For best results:

- Treat weeds at the recommended growth stages while young and actively growing
- Apply in good growing conditions
- Application must be made before the crop shields the weeds
- Weed stage should be checked prior to spraying

**Always read and follow the current IPCO product labels for directions ([www.ipco.ca](http://www.ipco.ca)).**
